

Press release

2026, January 1st

New prices have come into effect

Somes Water Company announces that the new prices/tariffs for which the intention to adjust was communicated in December came into effect on January 1, 2026, as follows:

Drinking water price: **7.86 lei/m³ including VAT (11% VAT)**

Sewerage and wastewater treatment tariff: **8.34 lei/m³ including VAT (11% VAT)**

The rationale for adjusting prices/tariffs lies in the need to comply with the Annual Plan for the Evolution of Water and Sewerage Tariffs (tariff strategy) for the period 2024-2028, in accordance with Decision No. 28/09.08.2024 of the Regional Association for Infrastructure Development in the Someș-Tisa River Basin, as well as the need to fulfill the conditions of the Financing Agreement for the Sustainable Development Program - PDD, concluded between the Ministry of European Investments and Projects and Somes Water Company.

For the modernization and expansion of the water and sewerage-treatment infrastructure, Somes Water Company has attracted the sixth financing in a total amount of over 625 million lei, with the works under this program covering the 2021-2027 programming period.

The new prices/rates were approved by the National Regulatory Authority for Public Utility Services, through Decision No. 163/10.12.2025. They will apply throughout the entire regional area served in the counties of Cluj, Sălaj, and Mureș, starting January 1, 2026.
