New investments in water infrastructure in the municipality of Măeriște, Sălaj County

Someș Water Company published in S.E.A.P. (Electronic Public Procurement System) the announcement regarding the procurement of the works contract: "Extension of the water distribution network in Măeriște commune, Sălaj county".

Currently, there is a water supply network in Măeriște, but it does not cover the entire town. The project involves extending the distribution network in the town with 4.9 km of PE 100 pipes. Once the distribution network is complete, 145 connections will be made to buildings, up to the property boundary.

The total duration of the contract is 54 months, of which 18 months represent the maximum period for the execution of the works, and 36 months represent the warranty period.

The works, worth 1,770,000 lei excluding VAT, will be financed from the "Maintenance, Replacement, Development - I.I.D." fund of the Someș Water Company, consisting of royalties and income tax transferred to the county administrative forum and returned to the Company for investments.

This contract will contribute to the socio-economic development of the area served by Compania de Apă Someș S.A. and to ensuring improved health and comfort for the population in terms of safe water supply.
